Microsoft Certified: Azure AI Apps
and Agents Developer Associate

$A1-901 \rightarrow A1-103 \longrightarrow A1-500$

This course is intended for software developers wanting to build AI infused applications that leverage Microsoft Foundry. Topics in this course include developing generative AI apps, building AI agents, and solutions that implement knowledge connections or tools in your agentic applications. This course also covers multimodal capabilities and understanding of complex content.

This course was designed for software engineers concerned with building, managing and deploying AI solutions that leverage Microsoft Foundry. They are familiar with Python and have knowledge on using APIs and SDKs to build agents and generative AI solutions on Azure.

Agenda

1. Develop generative AI apps in Azure
2. Develop AI agents in Azure
3. Develop natural language solutions in Azure
4. Extract insights from visual data on Azure

Let's get to know each other

- Company affiliation
- Title/function
- Your experience
- Your expectations for the course

Get the most out of your Microsoft Learn profile

Verify, track, and share your training and certification progress and accomplishments—*all on one platform*

- Claim your achievement code for this course and share you have completed it.
- Access your course material and track progress on your learning activities.
- Share and verify your Microsoft Certifications via email, on social networking platforms, and on your résumé.
- Download and print transcripts and certificates.
- Manage your upcoming activities and certification exam appointments.

Completed Labs:	0
Remaining Labs:	23
Total available time:	22 h 30 mins

Labs

1. Explore and compare models

2. Create a generative AI chat app

3. Create a generative AI app that uses tools

4. Apply guardrails to prevent the output of harmful content

5. Build AI agents with portal and VS Code
